KS and SLV: strong partners in lighting for more than 30 years

PICK-UP CENTER IN ESSEN

For more than 30 years KS Licht- und Elektrotechnik GmbH complements the products and services of SLV with a variety of services. We maintain a pick-up center for SLV products in the heart of the Ruhr area, where you can pick up the goods ordered from us at short notice.

EXPERIENCE SLV LUMINAIRES LIVE

We present a large selection of SLV luminaires on more than 300 m² of exhibition space. Here, our professionally trained consultants and lighting designers will advise you personally. At the same time, you can use our exhibition to present our luminaires to your customers in terms of function and effect. Convince yourself of the quality of our outdoor luminaires in the outdoor exhibition.

FREE LIGHTING DESIGN

We develop practical lighting solutions with you and according to your needs. Whether for business premises, salesrooms or private ambience: our lighting designers always have the right concepts for a demand-oriented and energetically sensible solution. We will be happy to calculate the payback time of your new, energy-saving LED lighting for you.

KS MULTI-BRAND LUMINAIRES ONLINE SHOP

In our business online shop at www.KS-Light.co.uk you will find everything that supports you in your daily work:

- Current special offers and new products
- Online check of product availability
- Find and order all spare parts easily
- Quick order form
- All catalogues for downloading or as a flip catalogue with Product links
- Specification texts, light distribution curves/LDT plug-ins and quick calculation tables

MULTI-FACETED ONE OFFS
THAT WILL WIN YOU
OVER WITH THEIR RADIANCE.

The RUSTY® family from SLV.

Outside, it's important to illuminate the darkness, to light the way, and to create captivating lighting moods. To achieve this, outdoor lights need to hold their own in terms of quality and durability, whatever the weather. So much the better that every RUSTY® light is also unique. Discover our timeless unique pieces with an unusual rust effect, which will cast your project in just the right light.

SLV RUSTY® – SIMPLY TIMELESS. AND TIMELESSLY GOOD.

A classic aesthetic in a new light: RUSTY® is an outdoor light family that will win you over with its characteristic rust effect. A timeless look that will only become more unique with every storm: light cannot age more attractively.

Unique eye-catchers.

A special treatment applied to the FeCSI steel creates the typical patina, which simultaneously protects the interior from corrosion. Together with wood, natural stone, concrete or white plastered walls, it is particularly effective.

Rust in constant variety.

Vibrant lighting in warm tones with a steel-hard shell: thanks to high IP protection ratings, the RUSTY® family can be used for a wide range of outdoor applications. With corresponding LEDs, every light will win you over with its energy-saving and atmospheric lighting. An optional ground spike and IP68-protected connection box ensure that your path lights remain anchored in the ground. Create modern yet classic lighting settings – at the edge of a path, on your terrace, or on a wall.

SLV RUSTY® – PLAN YOUR OUTSTANDING HIGHLIGHTS EFFICIENTLY.

Janin Giesemann
Online Marketing Manager,
Germany

Why have you chosen the RUSTY® series?

I knew of the RUSTY® series before I heard about SLV. In fact, the RUSTY® SQUARE can be found in the sample garden of the building materials store where we purchased our house-building materials. I noticed it right away, thanks to its rust effect – a long time before rust made the transition from unwanted side-effect to design trend. Even back then I found it very attractive and unusual. At the time, my garden plans were still a long way off, but I kept it in the back of my mind. And when the time finally came, the question of the right floor lighting had already been resolved for me.

So you orientated your light planning to the RUSTY®?

As the RUSTY® matched our personal tastes anyway, the style automatically harmonised with our planning and designs. From the outset, we wanted to work with warm contrasts. Cream and yellow tones were the first things we decided on, and terracotta tones automatically stood out as a form of differentiation. So the jump to a rust-effect wasn't a very big one.

We had originally planned on using the RUSTY® SQUARE. We actually only turned to the RUSTY® CONE on the advice of a colleague.

How did this happen?

In our garden the RUSTY® floor lights were supposed to fulfil different functions. At the edge of the path we wanted them to provide orientation and illuminate a safe route through the garden. But this wasn't particularly important for our seating area. Here, we wanted them to help create a cosy atmosphere for a relaxed end to the day. The RUSTY® CONE offered the best lighting for this special purpose in our garden. The decision was not so easy to make, however, because the RUSTY® SQUARE created a very beautiful lighting effect, especially on the wicker beach chair – just different. But since we have a lot of soft and round elements in the garden anyway, in the end we decided on the RUSTY® CONE.

Planning that gives results.

Our expert team will be delighted you support you in the planning of your lighting concept. We look forward to hearing from you:

KS-Light.co.uk

So you didn't consider lighting from any other manufacturers?

In our environment, we have only had positive experiences with the quality of SLV lighting. Our neighbours, for example, have had the RUSTY® SLOT next to their garden pond for over 10 years and are still satisfied. And above all, you can't see the lamp at all. You can't get a better experience than that. So why look elsewhere?! Next, we will be installing outdoor wall lights, and these will also be SLV products. Maybe the RUSTY® again, because it is now available as an UP/DOWN variant for the wall.

What material are SLV RUSTY® lights made of?

Specially treated FeCSi steel.

How is the rust layer created?

Rust occurs naturally through corrosion.

Do the lights continue to rust? Does this have an impact on the lifespan of the material?

The natural rust only affects the FeCSi steel: there is never any rust penetration. This guarantees a long lifespan.

Do the lights differ in terms of colour?

Due to the natural rusting process, every light is a unique piece.

DISCOVER LIGHTING
THAT SHINES EVEN MORE
BEAUTIFULLY OVER TIME.

RUSTY® 40/70 Pole

All-round high-quality and visible from afar, like a lighthouse: the RUSTY® bollard light can illuminate any outdoor area with a direct beam. Or position stunning highlights just where you want them. Thanks to a protection rating of IP55, these lights are perfectly protected against dust deposits and hose water from all directions. The LED variant will win you over with its durable COD modules, and the variant with an E27 socket provides flexibility. Expressing your individuality really can be this beautiful.

- Entry areas
- Driveways

RUSTY® 70
Pole
Art.No.: 229021

Illuminating the way like a lighthouse, the SLV RUSTY® brings a touch of maritime romance to your garden.

Our recommendation
For use as terrace lighting.

RUSTY® 40/70 Pole

The very essence of a transient aesthetic: the square RUSTY® variant features clear edges, making it a gem in any outdoor area. Its design is influenced by classic Japanese garden architecture. Clustered along the edge of a path, they light the way with practicality. But they don't just look exceptionally beautiful: they will also impress you with a protection rating of IP55, easy installation, and energy-saving technology.

RUSTY® 40
Pole
Art.No.: 229420

A symbol of illumination: the striking architecture of a Japanese pagoda, as well as the bold shape of the SLV RUSTY®.

Our recommendation

For use in driveways and entry areas.

RUSTY® SLOT 50/80 Pole

If you want to create an indirect lighting atmosphere, RUSTY® SLOT is the perfect choice for you. A clever design allows the square bollard light and path light to provide atmospheric illumination directed towards the ground. Robust, elegant, characteristic – this is how RUSTY® SLOT makes a strong statement across the board, with its asymmetrical distribution, clear design, and exceptional stability.

RUSTY® PATHLIGHT 40/70 Pole

Anyone who wants to perfect rusty purism will love the L-shaped RUSTY® PATHLIGHT. The path light is characterised by its linear design. It creates glare-free lighting for easy orientation in the dark. Alongside the LED variant, the RUSTY® PATHLIGHT is available with a GX53 fitting, which can be fitted with a light bulb with a maximum output of 9 watts. Energy-efficient and long-lasting – and the RUSTY® PATHLIGHT can also be installed quickly and safely using the included screws.

The essence of purism, but still eye-catching:
on the banks of the Rhine and now in your garden.
RUSTY® PATHLIGHT.

Our recommendation
For use as floor lighting.

RUSTY® CONE 25/40/70 Pole

The RUSTY® CONE variants evoke a nautical world of the past. Nevertheless, they also harmonise beautifully with modern architecture. They can be used versatilely as base lighting or bollard lighting. Thanks to the selection of a voluminous light glass, they radiate a wide-ranging light. Universal one-offs, which can be used to create perfectly illuminated accents. Adding a unique and eye-catching look to any garden or driveway.

Classic bollard in a nautical style. And you can feel the sea air blowing through your garden: SLV RUSTY® CONE.

Our recommendation
For use as floor lighting.

RUSTY® UP/DOWN WL

In multi-faceted rust-tones, RUSTY® UP/DOWN gives an attractive look to facades. Square or round for a unique look, which harmonises perfectly with the look of red bricks. These lights, which produce an indirect beam, are fitted with energy-efficient and long-lasting COB LEDs. Adjust the light colour (3000K/4000K) with just one click of the CCT switch. Perfect for adapting to use in any context. With a protection rating of IP65, RUSTY® UP/DOWN is perfectly suited to use outdoors.
